Testimonials

"Barry's Best had an incredible message of perseverance through difficult, realistic, but unpreventable situations. Throughout the message of the book, Alex weaves rich vocabulary words that can be used to build upon students' lexicon. After reading his book, Alex welcomed a question and answer session. This time inspired and excited my students to tell their own stories. Having Alex read to my class was such a memorable experience. I still have students who come back to my classroom and talk about it to this day."

"The children's book reading was such an exciting and engaging experience for my kindergarten students. The author used expressive voices, and just the right pace to keep our young students engaged. My students asked questions and were excited about the story. It sparked so many meaningful conversations afterward and encouraged a love of books that I know will stay with them."
